How we protect data

- **End-to-end encryption and zero knowledge.** You encrypt your vault on your own device. We don't have the key, so we can't read its contents, hand them over in readable form, or use them.
- **Data minimization.** We only process account data as needed to run the service, handle billing, and keep accounts secure.
- **Servers in the European Union.** We store account and vault data in the EU (Amazon Web Services, Frankfurt). Our Privacy Policy lists providers outside the EEA and the safeguards for those transfers.
- **Your rights, built into the App.** You can correct your account data in settings, export your vault at any time, and delete your account yourself.
- **A data processing agreement for businesses.** Organizations on the Team or Business plan enter into our Data Processing Agreement (Article 28 GDPR).

Details: Privacy Policy, Security Whitepaper.
